

Abstract

The present invention is drawn to a recycled-polyester resin composition containing 100 parts by weight of a recycled polyester resin (A), 0.5 to 20 parts by weight of a lactone polymer (B), 0.5 to 30 parts by weight of an epoxidized diene-based block copolymer (C) and, optionally, 0.5 to 30 parts by weight of a polyolefin resin (D); and an article molded from the composition. The composition exhibits improved formability in terms of, for example, injection molding and extrusion molding, and the molded article has excellent mechanical strength.
